Doing Business in Country

Market Overview

- Zambia is a politically stable, multi-party democracy, rich in natural resources.

- The economy enjoys liberalized prices on most items, a stable foreign exchange rates, and no currency controls

- Zambia’s main export partner is Switzerland (45 percent of total exports, based on Swiss ownership of one of the country’s copper mines). Others include: China (20 percent), South Africa, United Kingdom, Zimbabwe and DR Congo. Zambia’s main import partner is South Africa followed by DR Congo and China.

- In 2016, Zambia’s total imports from the United States were $81.2 million, compared to $84.2 million in 2015. These consisted primarily of machinery, rubber, and vehicles.

- In 2016, about $46.6 million in Zambian exports went to the United States, compared to $47.1.7 million in 2015. These consisted almost entirely of copper, cobalt, precious stones (primarily emeralds), and cotton.

Market Challenges

- The Zambian economy is heavily dependent on copper mining and rain-fed agricultural production, which exposes the economy to such external vulnerabilities as changes in global copper prices and seasonal weather patterns. Zambia has a relatively small domestic market that is spread across a country roughly the size of Texas. Zambia is a member of the Southern African Development Community (SADC) and the Common Market for Eastern and Southern Africa (COMESA).

- Other challenges include: pervasive corruption, complex permit requirements, insufficient energy supply, inadequate law enforcement capacity, a weak court system, unreliable and expensive communication, and low, but growing, internet connectivity.

- Although hourly wages are low, actual labor costs are considered high for the region — driven up by stringent labor laws and a shortage of skilled labor.

- Tightening of monetary policy by the Bank of Zambia has been effective in stabilizing the exchange rate but current liquidity conditions have contributed to the persistent under-subscription of treasury bills and bonds. Commercial lending rates are still very high, between 35 to 45 per cent.

- Although improvements have been made at key entry points, including the opening of integrated customs services at the Zambia-Zimbabwe border at Chirundu, the DRC-Zambia border at Kasumalesa, and the Zambia-Tanzania border at Nakonde, the cross-border movement of goods remains slow. This, combined with high fuel prices, translates into steep transportation costs.
- Government policies with respect to business and trade change often without prior consultation and are a challenge. Similarly, market-distorting subsidies in the agricultural sector inhibit the growth of the private enterprise.

**Market Opportunities**

- There are a number of commercial opportunities in Zambia’s emerging economy, including a rising middle class in urban population centers. In general, most sectors are uncompetitive and are dominated by a few large players, leaving plenty of room for new market entrants. Market opportunities abound in the following sectors:

- Energy: Demand for electricity has been growing at an annual rate of about 3% and generation development is starting to grow. Investment opportunities include electricity generation, upstream and downstream petroleum, and renewable energies. Demand for renewable energies has grown significantly. Solar projects under private-public partnerships are ripe for development.

- Infrastructure: Building and construction is the largest industrial sector. Zambia has a national housing deficit of 1.3 million. Opportunities in the sector are led by demand in the mining industry, infrastructure development, residential buildings and offices.

- Mining: Zambia is the second largest copper producer in Africa and seventh largest in the world. Foreign Direct Investment (FDI), since privatization, totals more than $8 billion. Opportunities exist in exploration, mine services, water management, engineering, construction, and environmental services.

- Agriculture: The government is developing new farm block areas in all 10 provinces for large commercial farms. Opportunities exist in large-scale farming, farm input and agro-processing, equipment supply, and commodity storage and trading.

- Manufacturing: The government is developing a series of Multi-Facility Economic Zones (MFEZ) and Industrial Parks (industrial areas for both domestic and export orientated industries) to attract domestic and foreign direct investment. Opportunities include agro processing (food and beverages), textiles and leather, secondary processing of minerals, chemical products, electricity construction materials, and wood products. Investment incentives are available for priority sectors or investment in MFEZ.

- Information & Communication Technology (ICT): The ICT sector has seen growth as government has embarked on reforms and formation of an ICT policy. Opportunities include provision of retail fiber optic, mobile and internet service providers, software development, and ICT parks.

- Tourism: Zambia shares the world famous Victoria Falls, one of the Seven Natural Wonders of the World, with Zimbabwe. Zambia boasts 20 national parks and 34 game management areas. There are opportunities in tourism services and infrastructure as Zambia lacks adequate hotel room capacity, tourism operators, and transportation infrastructure in its tourism and copper producing regions.
Market Entry Strategy

- Relationships are key in finding a good business partner and a company needs to visit Zambia to maximize prospects for successful market entry.

- U.S. companies usually either license through local representatives, or export directly or indirectly through (often South African) intermediaries.

- Whatever market entry strategy is chosen, businesses should bear in mind that entering the market will require local expertise on legal and regulatory issues.

Political Environment

Political Environment
Link to the State Department’s website for background on the country’s political environment http://www.state.gov/r/pa/ei/bgn/2359.html.

Selling U.S. Products & Services

Using an Agent to Sell U.S. Products and Services
There is generally substantial local interest in representing and/or distributing on behalf of U.S. companies. Financing local inventories is often a problem, especially given high commercial loan rates. Few companies have sales or service networks that meet U.S. standards and expectations.

The U.S. Embassy has the capacity to provide full commercial services when requested through a U.S. Department of Commerce district office, or when contacted directly by a U.S. company.

The commercial services offered by the U.S. Embassy are listed at the link: http://zambia.usembassy.gov/business.html.

Local offices of international accounting and consulting firms can also assist in identifying qualified local business partners.

Establishing an Office
Foreign companies that plan to invest in Zambia can take advantage of the services at the One Stop Shop to obtain an investment license. The procedure is straightforward and licenses are approved or disapproved within three working days. In the same venue, one can access the Electronic Registry for Business Licenses (e-registry), which provides online access to information on all licenses and permits required to establish and operate businesses in Zambia.

E-registry is available on http://www.businesslicenses.gov.zm.
The following are the requirements for registering a foreign company in Zambia:

1. At least one and not more than nine local directors must be appointed as directors of a foreign company. At least one local director of the company must be resident in Zambia, and if the company has more than two local directors, more than half of them shall be residents of Zambia.
2. There must be at least one documentary agent (a firm, corporate body registered in Zambia, or an individual who is a resident in Zambia).
3. A certified copy of the Certificate of Incorporation from the country of origin must be attached to Form 46.
4. The charter, statutes, regulations, memorandum and articles, or other instrument relating to a foreign company must be submitted.
5. The Registration Fee of K4, 166 (about $417.00) must be paid.
6. The issuance and sealing of the Certificate of Registration marks the end of the process for registration.

This information can also be found at the above web address of the Patents and Companies Registration Agency (PACRA).

The Lusaka One Stop Shop  
P.O. Box 30819  
Kwacha House Annex Building  
Cairo Road  
Lusaka, Zambia  
Tel: +260-211-231104  
Fax: +260-211-225270  
Email: onestopshop@zda.org.zm

Franchising  
Franchise business arrangements in Zambia are based on British contract law rather than more-binding U.S. franchising regulations. There is increased interest in franchising in Zambia generated by publicity and exposure to international franchise trade events. Lack of financing options, however, remains a major obstacle to franchise business development in Zambia.

There may be opportunities for U.S. franchises in the following areas:

- Fast Foods
- Restaurants
- Retail (including pharmaceutical and hardware)
- Clinics (including specialized hospitals)
- Hotels and Lodges
- Internet Service Providers

Direct Marketing  
There are no restrictions on conducting direct marketing in Zambia. Advancements in technology have meant that the internet is now a more pronounced medium of communication.

Mobile phones are no longer used only for conventional purposes but for interaction on social networking communities and e-commerce.
Payment systems for electricity tokens, water bills, television channel subscriptions, and sending and receiving money are now available on mobile phones. There is an increase in mobile phone usage and digital marketing activities.

**Joint Ventures/Licensing**
The Zambian business community has a strong interest in joint ventures and licensing agreements. Local investors actively seek out these arrangements in order to overcome scarcity of domestic capital, technology, and expertise. There are no legal restrictions that define the terms of a joint venture arrangement. A suitable partnership should be established contractually and registered with the Patent and Company Registration Agency (PACRA).

**Selling to the Government**
The Government of the Republic of Zambia (GRZ) uses the e-procurement system for most government contracts that range from acquisition of goods to works and consultancy services. Some contracts are awarded through single source without following tender procedures. In addition, the government also uses the World Bank Group’s public-private-partnership in infrastructure resource center for infrastructure procurements.

**Distribution & Sales Channels**
Wholesale trade and distribution is concentrated in major towns around the country, including Lusaka, Kitwe, Ndola, Livingstone, Kasama and Chipata.

Goods destined for Zambia arrive via South Africa (Durban, Port Elizabeth, and East London), Namibia (Walvis Bay), Mozambique (Beira and Nacala), and Tanzania (Dar es Salaam). Durban, Walvis Bay and Dar es Salaam are the most commonly used sea ports.

Virtually all imports are transported by truck and enter Zambia primarily through Chirundu and Livingstone (on the Zimbabwean border), Kazungula (on the Botswana border), Nakonde (on the Tanzanian border), and Seshke (on the Namibian border).

The Kasumbalesa border with DR Congo, Nakonde border with Tanzania, and Chanida border with Mozambique see a great deal of mining sector-related traffic.

Imports coming through Durban, Walvis Bay, and Dar es Salaam can take up to two weeks to reach Zambia, due primarily to delays at border crossings.

**Express Delivery**
Zambia has a few express delivery services which include international companies such as DHL, Mercury Express Logistics, FedEx, and the Express Mail Service (EMS) offered by the Zambia Postal Service Corporation.

EMS has the widest domestic network utilizing the Post Office infrastructure which has 144 postal outlets and a fleet of delivery vehicles. Delivery of letters, documents and parcels within Zambia take a few hours to 48
hours depending on distance. International deliveries can take between 1-4 days and 3-5 days to the United States and Canada.

In case of export, a customs declaration form and commercial invoice quoted in any convertible currency would be needed for clearance. The Customer Service Centers and Sales clerks would advise on proper packaging. The minimum weight for a single parcel is 30 kilograms but this is negotiable depending on the nature of the parcel. In case of dutiable items, expected recipients would be invited to collect items or parcels which would be subjected to customs examination.

Parcels and documents are examined by sales clerks to ensure that prohibited items are not sent through the service.

EMS delivery charges would range from $1-$5 while FedEx, DHL and Mercury delivery charges range from $10-$30 per mail. Any mail costing $300 would be assessed by customs officials who would also charge a certain percentage for the package.

**Selling Factors & Techniques**

Selling is normally done on a cash basis due to scarce and expensive credit. Companies that can offer credit, or an extended payment schedule, have an edge even if their prices are higher.

After-sales service is an important factor for technical products. Imported food products must have English-language labels that detail ingredients and shelf life. Any food products failing to meet this requirement are confiscated by local authorities and destroyed without compensation.

Goods and services are advertised through flyers in the main daily newspapers such as The Mast, Times of Zambia, and Daily Mail for wider circulation at a fee.

There are five private television stations and two public channels operated by the state-run Zambia National Broadcasting Corporation. The television channels and community radio stations provide advertising services.

**E-commerce**

**Overview:**
The Zambia telecommunications sector has achieved significant development over the last decade. Building on the 1994 reforms, which opened the telecommunication market to new entrants, the sector has experienced rapid growth. Market penetration is still low while prevailing prices are high indicating that the market is still largely underdeveloped with room for considerably more competition. In 2009, Zambia established the national Information Communication Technology (ICT) policy for regulating the telecommunication sector in the country. The Zambia National Information and Communications Technology ICT policy was developed based on thirteen pillars and three core thematic areas namely capacity building, effective regulatory and legal framework, and competitive ICT sector. To regulate the information and communication sector, the government established the Zambia Information and Communications Authority (ZICTA).

E-commerce is a growing market in Zambia. There is a different growth rate for different channels and mobile commerce is by far the fastest growing. The 2016 ZICTA report indicates that Zambia’s internet subscriber base
fell from 6.1 million to 5.2 million in 2016. The drop in 2016 is attributed to the high cost of data services resulting in users turning to basic handsets instead of data-enabled phones. Notable industries exploiting e-commerce space include banks and telecommunication companies.

**Current Market trends:**
Information and Communication Technologies Act Number 15 of 2009 guides ICT operations in Zambia. ZICTA provides for the regulation of information and communication technology; facilitates access to information and communication technologies; protects the right and interests of service providers and consumers; repealed the Telecommunications Act 1994 and the Radio Communications Act 1994; and provides for matters connected with or incidentals to the foregoing.

Most purchase in Zambia is through the mobile commerce channels namely:

a) Credit Cards  
b) Debit Cards  
c) Automated Teller Machine (ATM) bill payments  
d) Kiosks  
e) Mobile devices

The major m-commerce channel is the mobile platform because of the coverage of mobile data networks. The government is building more communication towers to house base stations, enabling increased coverage for data access.

**Domestic eCommerce:**
eCommerce business to the consumer market is still developing. There is not much discussion on domestic eCommerce but most Zambians are comfortable with purchase of electricity tokens, digital TV purchase, water bill payment, and cardless transactions like eWallet.

**Cross-Border eCommerce:**
The top countries from where Zambians make online purchases include:

a) USA (eBay)  
b) United Kingdom (eBay)  
c) China (Alibaba)

Products range from electronics, footwear, clothing, accessories, motor vehicle spare parts and motor vehicles. Some challenges of online purchases are purchasing defective, poor quality gadgets or products and the supply of false information. Other challenges include the lack of information by the service provider such as contact details, right to withdrawal, non-receipt of the item purchased, terms and conditions, costs such as customs duty, value added tax and import declaration fee.

**B2B eCommerce:**
Zambia is developing a B2B portal which is developing a database of suppliers and buyers and providing electronic tools to enable buyers submit tender information and receive bids from suppliers. This will increase trade between local small and medium enterprises and large companies.

Other entities take advantage of the B2B concept. For example the national pensions fund (NAPSA) has partnered with several banks to enable payments of pension contributions. Other partnerships include:
a) Zambia Electricity Supply Company is integrating with IT companies for purchase and payment of electricity tokens
b) Banks partnering with private companies in providing payment platforms to enable bank accounts to be debited for online transactions
c) Water utility companies partnering with system integrators to allow for online payments of bills
d) Pay television and many more services and products can be paid via the following channels:
   1) Mobile banking
   2) SMS Banking
   3) ATM
   4) Kiosk
   5) Website
   6) Credit Cards
   7) Debit cards

**eCommerce Services:**
The main service providers that help key industries are:
a) Mobile Telecoms operators in providing
   1) Unstructured Supplementary Service Data services
   2) Data Services
   3) Short Messaging Services
b) Banks in providing access to accounts for purchases
c) Service providers such as:
   1) Tax Organizations
   2) Pensions
   3) Electricity
   4) Water
   5) Television

**eCommerce Intellectual Property Rights (IPR)**
There is no proper safeguarding of IPR in Zambia although the Patent and Company Registration Office has a small unit that attempts to enforce this. This unit has not offered any proper procedures or guidelines on IPR.

**Popular eCommerce Sites:**
The most commonly consumed platforms include:
a) Zambia Revenue Authority, used for paying domestic taxes and customs services.
b) National Pension Scheme Authority
c) Patent and Company Registration Office
d) Zoona – an electronic transfer service that enables consumers to send or receive money within Zambia. The company offers services through a distribution network of cash agents and retailers countrywide. Through Zoona, consumers can pay bills, make loan repayments, and buy electronic vouchers.
e) Dot Com Zambia – is a shopping platform that allows users to shop online from in-country (Zambia) and from international retailers located in the United Kingdom, the United States, and China. The company also offers a digital bus ticketing system for sub-Saharan Africa.

**Online Payment**
The most common payment methods for online e-commerce transactions in Zambia include:
a) Mobile based
   1) Mobile money
2) eWallet  
3) Mobile banking  
b) Credit cards  
c) Debit Cards  
d) ATM  
e) Kiosk  
f) Web sites  
g) Paybills.co.zm (a payment service that allows customers in Zambia to pay utility bills, pay television subscriptions, and buy air time using VISA or MasterCard)

**Mobile eCommerce**

U.S. businesses can leverage the following vehicles for eCommerce that have become more widely available:

a) Mobile Apps for  
   1) Agri-business  
   2) Match making  
   3) Payments  
   4) Insurance  
   5) Banking  

b) System integration that enable systems to communicate among each other  
c) Toll gates and pre-paid systems  
d) Point of Sale for various business houses

**Digital Marketing**

There are very few digital marketing houses in Zambia. Several websites offer free space for advertising on their websites but oftentimes does not guarantee much traffic. Large, energy-intensive digital screens located at major intersections are a popular form of advertising used by many companies.

There is no single portal to register for online advertising. Below are a few that offer advertising opportunities:

- [http://www.zambiausachamber.org/](http://www.zambiausachamber.org/)  
- [https://infozambia.com/advertise](https://infozambia.com/advertise)  

**Major Buying Holidays**

The major consumer ‘buying holidays’ and most popular shopping days on eCommerce in Zambia include:

a) Christmas  
b) Agriculture and Commercial Show  
c) Trade Fairs  
d) Easter  
e) New Year

**Social Media**

There is a surge in social media usage, especially in the urban areas where there is mobile data coverage. The following are trending:

- Facebook – attracts a younger audience  
- WhatsApp is very popular among all age groups  
  a) Business networking  
  b) Socializing  
  c) Groups for collaboration  
- Voice and video calls  
- Twitter is not very popular in Zambia
Trade Promotion & Advertising

Zambia holds annual trade fairs. The main trade events are:

- Agritech Expo Zambia annually –
  A premier agriculture expo held annually in April
  www.agritech-expo.com

- CCPC, Copperbelt Mining, Agriculture, and Commercial Show
  Held during the last week of May in Kitwe (Copperbelt Province)

- Zambia International Mining and Energy Conference & Exhibition --
  Mid-June
  http://ametrade.org/zimeczambia/

- Zambia International Trade Fair
  During the last week of June in Ndola (Copperbelt Province)
  http://www.zitf.org.zm

- Zambia Agriculture and Commercial Show
  First week of August in Lusaka
  http://www.acsz.co.zm

- Zambia International Building, Construction and Interiors Exhibition –
  Mid-June
  http://10times.com/zambia/tradeshows

- Zambia International Property Expo
  Takes place annually in May in Lusaka
  http://www.zipexpo.com/

Electronic Media: Zambia has two government-owned national channels, five private television stations and over 60 community radio stations. Radio broadcasts are in English as well as local languages and tend to reach a wider audience than television broadcasts.

Contacts for the dominant television and radio broadcasters are:

Zambia National Broadcasting Company (ZNBC) TV1 and TV2
Email: znbctv@zamtel.zm
Website: www.znbc.co.zm

MUVI Television
Email: muvi@iconnect.zm
Website: www.muvitv.com

Radio Phoenix
Print Media: The Times of Zambia and the Zambia Daily Mail are state-owned daily newspapers. The two independent daily newspapers are The Mast and The Nation. Monthly business publications include the Zambia National Farmers Union’s Zambian Farmer and the Farmers Gazette.

Contacts for print media are:

Times of Zambia
Email: times@zamtel.zm
Website: www.times.co.zm

Zambia Daily Mail
Email: zadama@zamnet.zm
Website: www.daily-mail.co.zm

Daily Nation Newspapers
Email: sales@zambiadailynation.com
Website: https://www.dailynation.news/

The Mast Newspaper
Email: info@themastonline.com
Website: https://www.themastonline.com/

The U.S. advertising firm Young & Rubicam has offices in Zambia and may be contacted at the following address:
Young & Rubicam (Zambia) Limited
Email: yrubicam@coppernet.zm

Pricing
Local pricing are typically high as they usually account for international and domestic transportation charges, customs duty, and value added tax (16%).

In general, Zambian consumers are price conscious and place greater emphasis on price than quality. However, in many sectors Zambians still see the value in U.S. products and services compared to products and services from other countries.

Sales Service/Customer Support
After-sales service and customer support are important factors to business, particularly for technical products such as computers and equipment. Most business houses now provide customary sales and customer support especially for electronics and equipment.
Protecting Intellectual Property
In any foreign market companies should consider several general principles for effective management and protection of their intellectual property. The following articles provide additional background on these principles:

Protecting Intellectual Property and Corruption

https://www.export.gov/article?id=Protecting-Intellectual-Property

https://www.export.gov/article?id=Corruption

Due Diligence
All U.S. companies are advised to exercise due diligence before doing business in Zambia. The Embassy has the capacity to provide information about local companies when requested through a U.S. Department of Commerce district office, or when contacted directly by a U.S. company through an International Company Profile. The International Company Profile (ICP) is the Department of Commerce's background check on the reliability of potential trading partners. An ICP report includes information on a prospective client, including: principal owners, year established, size, sales, financial information, trade references, general reputation, type of organization and territory covered, and a personal visit by an officer in order to give a professional opinion on the company. A U.S. exporter can obtain this information, as well as detailed answers to specific questions about the prospective partner, in a confidential report. In addition, the U.S. Embassy will provide a recommendation on the suitability of the profiled company as a business partner.

Also, local attorneys or business consultants can provide comprehensive assistance in determining the bona fides of a prospective business partner.

Local Professional Services
A number of professional service providers are available to U.S. companies. A list of attorneys can be found on the Embassy website:

Zambia Institute of Chartered Accountants: http://www.zica.co.zm
Zambia Institute of Marketing: http://zambiainstituteofmarketing.co.zm/
National Construction Council of Zambia: http://www.ncc.org.zm/
The Engineering Institute of Zambia: http://www.eiz.org.zm/
Association of Professional Immigration Consultants: http://www.apiczambia.org.zm/

Principle Business Associations
Zambia Chamber of Commerce and Industry (ZACCI): ZACCI is a national body representing the interests of the private business sector in Zambia focusing on the promotion and development of trade, commerce, and industry. Through its membership, ZACCI represents several thousand businesses in Zambia and a huge network of companies of all sizes and sectors. ZACCI offers a range of services to its members and represents private sector interests towards the government for the benefit of Zambia’s private sector as a whole.
Zambia Chamber of Mines (ZCM): The ZCM was established for the purposes of promoting the interests of its members, and encouraging, protecting and fostering the mining industry in Zambia. The Chamber is a representative of all the major operating mines in Zambia both large and small. The main role of the Chamber is advocacy in creating synergies. The ZCM aims to influence policy in the mining sector to reflect the vision and goals of its members as well as to promote economic growth in Zambia.

Association of Zambian Exploration Companies (AZMEC): AZMEC provides a discussion forum and dedicated lobby group for mineral exploration companies and mining companies as well as government representatives, service providers, academic institutions and other interested parties in Zambia with the view to contributing to the growth, promotion, and sustainable development of the sector in Zambia.

Zambia Association of Manufacturers (ZAM): ZAM is the voice of industry, representing the interest of the entire manufacturing sector and other related economic sectors in Zambia. ZAM was established to foster dialogue and relations between the manufacturers and government so as to increase industrial intensity in Zambia. ZAM’s major objective is to promote the manufacturing sector through policy advocacy, dialogue, lobbying and technology upgrading of the production process as a way of improving productivity and competitiveness in the industry.

American Chamber of Commerce in Zambia (AmCham): Founded in 2012, AmCham today has nearly 100 members from various multinational corporations and local Zambian businesses. The organization hosts several annual events and is working to increase its efforts, particularly in advocating with the government on issues critical to local business.

Limitations on Selling U.S. Products and Services
Zambia exhibits a policy of economic openness and as such no sector or industry is reserved for citizens. All sectors are open to both local and foreign businesses and investors.

Zambia Daily Mail: www.daily-mail.co.zm

Leading Sectors for U.S. Exports & Investments
There are commercial opportunities in Zambia’s emerging economy, including a rising middle class in urban population centers. In general, most sectors are uncompetitive and are dominated by a few large players, leaving plenty of room for new market entrants. Market opportunities abound in the following sectors:

Energy

Overview
There are five electricity companies in Zambia: the state-owned Zambia Electricity Supply Corporation (ZESCO) Limited; Copperbelt Energy Corporation (CEC); North-Western Energy Corporation (NWEC); Lusemfwa Hydro Power Company (LHPC); and Maamba Collieries Limited. Currently, ZESCO is the largest electricity company in the country, running and operating power stations, transmission lines, and distribution networks.
Zambia’s installed capacity stands at 2,347 Megawatts (MW). The main hydro power stations include Kariba North Bank Power Station, Kafue Gorge Power Station, Victoria Falls Power Station and Itezhi Tezhi Hydro Power Station. One coal-fired plant, Maamba Collieries, was commissioned towards the end of 2016 and is currently generating 300 MW of power purchased by ZESCO for distribution on the national grid.

Demand for power in the various sectors of the economy has grown rapidly over the years and continues to grow. The Zambia Development Agency (ZDA) states that the demand for electricity in Zambia has been growing at an average 3% or between 150MW-200MW each year. Zambia is a member of the Southern Africa Power Pool and is therefore able to sell or buy excess electricity generated in the region.

Zambia is implementing the Second Scaling Solar project by the Industrial Development Corporation (IDC), and in close coordination with the Ministry of Energy. This second mandate for Scaling Solar was signed in February 2017 with the World Bank under the IFC program that is helping developing countries procure low cost, privately financed, solar power. The First Scaling Solar project was auctioned in May 2016 for two solar PV plants of 50 MW each and were awarded to international energy developers.

**Sub-Sector Best Prospects**

Solar resources: Zambia has abundant renewable energy resources spread out through out the country. Zambia enjoys long and intense hours of annual sunlight to support solar energy generations, and averages about 2,000-3,000 hours of sunshine per year. The solar power or photovoltaic (PV) market remains dominated by government, NGO and donor funded projects. U.S. products are well received among competition from China, South Africa, and India. The government intends to generate 600 MW through solar by 2020.

**Power Africa Support:** Power Africa supports a number of energy initiatives in Zambia, including technical assistance to the government institutions to develop a renewable energy feed-in tariff (REFIT) and a standardized power purchase agreement (PPA). As with many developing countries, the establishment of REFIT has spurred the on-boarding of new, small, private-sector driven renewable energy power generation partners. Power Africa also supported the introduction of IFC’s *Scaling Solar* program in Zambia, which has been key in financing critical costs necessary for a transparent, competitive bidding process to attract project developers, build institutional capacity, and catalyze market growth. In accelerating off-grid energy growth, the Power Africa Off-Grid Energy Challenge has provided small grants for innovative, entrepreneurial developers seeking to expand rural access. Learn more about how Power Africa is partnering to address key challenges in Zambia’s electricity sector and supporting private sector investment in energy at: [https://www.usaid.gov/powerafrica/zambia](https://www.usaid.gov/powerafrica/zambia).

**Opportunities**

There opportunities in electricity generation and transmission, refineries, storage facilities and pipelines for petroleum and gas, renewable energy facilities and transport facilities for coal distribution and exports. Opportunities for solar energy include residential, schools, hospitals, health centers, commercial, utility, off-grid and agricultural sector.

**Key government and regulatory agencies for Solar projects:**

Industrial Development Corporation
Agricultural Sector

The Zambian agriculture sector comprises crops, livestock, and fisheries. There are three broad categories of farmers: small-scale, medium, and large-scale. Small-scale farmers are generally subsistence producers of staple foods with occasional marketable surplus. Medium-scale farmers produce maize and a few other cash crops for the market. Large-scale farmers produce various crops for the local and export markets. Most Zambians are subsistence farmers. Agriculture contributes about 19% to GDP and employs three quarters of the population. Domestic production is comprised of crops such as maize, sorghum, millet, and cassava while exports are driven by sugar, soyabeans, coffee, groundnuts, rice, and cotton as well as horticultural produce. The Zambia territory is 75 million hectares (752,000 km2) large, out of which 58% (42 million hectares) is classified as medium to high potential for agriculture production. However, only 15% of this land is currently under cultivation. Zambia enjoys 40% of sub-Saharan water resources. Despite this, there is very little mechanical irrigation. The majority of farms are dependent on rain-fed growing cycles.

Sub-Sector Best Prospects

Government is promoting agriculture as a way to diversify the economy from copper with the development of farm blocks in all 10 provinces for large and medium commercial farming, fish farming and livestock. Private equity and other investors are active in this sector.

Opportunities

Agricultural cultivation in Zambia is mostly traditional, by hoe in particular, and the sector is rain-fed. Opportunities include large-scale farming, farm inputs and equipment supply, agro-processing and commodity trading. The sector is in dire need of mechanization.

Infrastructure Development

Overview
Infrastructure development still remains a major challenge to growth, economic diversification, and human development in Zambia. Major areas in this sector include investment in health, education, and water and sanitation; increase power generation capacity through up-grading and construction of new hydropower stations, and use of alternative energy sources; improving and expanding the rail network to reduce the burden placed on road infrastructure; and constructing additional inter provincial and inter district roads to open up the country through the Link Zambia 8000 project.

It is estimated that the backlog of housing units in Zambia is about 1.3 million and that 110,000 units per year will be required to clear the backlog for next ten years.

Sub-Sector Best Prospects
Zambia is implementing the Link Zambia 8000 project which is aimed at transforming the country from land-locked to land- linked. The project involves upgrading roads to bituminous standards of 8,201 km at an estimated cost of $5.6 billion; National Road Tolling also aims to keep the core road network in maintainable condition and broaden financing options for road infrastructure development; the Pave Zambia 2000 which is aimed at rehabilitation of 2000 km of urban roads; and the L400 which entails construction of 400 km of Lusaka Urban roads at $348 million.

Opportunities
Providing finance for the housing and other infrastructure projects is another opportunity for U.S. investors. Zambia has a critical shortage of housing estimated to be about 1.3 million units countrywide and government recommends an annual delivery rate of 110,000 units per year to meet demand in the next 10 years. Other areas include the mining industry, shopping centers, real estate development and offices, rail, and other transport networks.

Mining and Minerals

Overview
Zambia possesses the world’s highest-grade deposits of copper and is ranked 7th largest copper producer in the world. Copper contributes over 70% of the country’s national foreign earnings. Zambia produces about 20% of the world’s emeralds. The mining sector is governed and regulated by the Mines and Minerals Development Act No. 7 of 2008 which covers types of mining rights, acquisition of mining rights, rights/obligations conferred on the mining right holder, transferability of mining rights, safety, health and environment and provides for the environmental protection fund, mineral royalties, fees and charges, and export of minerals.

Sub-Sector Best Prospects
There are prospects in uranium, coal mining, and gas exploration.
Opportunities
Opportunities exist in exploration, mine services, water management, engineering, construction, and environmental services.

Information Communication Technology

Overview
The ICT sector has seen growth following the establishment of a National ICT policy for regulating the telecom sector in Zambia. The telecom sector comprises public switched telephone network (PSTN), international voice, local loop, national voice, mobile, private data networks and internet operators. All these subsectors are liberalized. PSTN and international voice are monopolistic sub-sectors, however the national voice, local loop, mobile internet and private data networks are competitive sectors. Government supports and encourages networking of services and applications through promoting e-commerce, e-agriculture, e-health and e-education and trade promotion programmes for goods and services. The government is working towards establishing e-government online services.
Opportunities
Opportunities include provision of retail fiber optic, mobile and internet service providers, software development, and ICT parks.

Medical Equipment

Overview
Zambia has a developing private and public health care system which provides diagnostic and curative medical services. Zambia benefits from USAID’s assistance, primarily through the United States President’s Emergency Plan for AIDS Relief (PEPFAR), to scale-up integrated prevention, care, and treatment programs, and to lessen the impact of HIV/AIDS. Under PEPFAR, more than 720,000 Zambians receive life-saving antiretroviral treatment as compared to 3,500 in 2004, the HIV incidence rate has been cut in half in the last decade, and the infection rate for children born to HIV-infected mothers has dropped from 45 percent to less than 5 percent in 2017.

Sub-Sector Best Prospects
Zambia, along with all neighboring countries save for South Africa, do not have hospital centers of excellence to treat cases requiring specialized treatment, and lack specialist diagnostic and treatment centers to treat cardiovascular, liver, renal, and cancer diseases.

Opportunities
Opportunities for investment in specialist medical diagnostic and treatment in the following areas: Cardiology; Radiotherapy; Neurology; Urology; Traumatology; Nephrology & Dialysis; Diabetology; Dermatology; Physiotherapy; Key hole surgery; Stem Cell Therapy; and other surgical interventions.

Travel and Tourism

Overview
Zambia stands out as one of the prime tourism destinations in Africa offering a wealth of natural tourism assets. Attractions include the Victoria Falls, one of the Seven Natural Wonders of the World and UNESCO Heritage site, lakes and rivers, wildlife protected areas’ occupying about 10% of the country’s total land area. Endowed with a rich and diverse culture resulting in the occurrence of more than 30 colorful traditional ceremonies annually, it also has 20 national parks and 34 game management areas. However, this sector continues to be underutilized with opportunities for improvement. Eco-tourism is still under-exploited in Zambia. With abundant nature and wilderness, this segment of tourism offers exciting investment opportunities.

Opportunities
There are opportunities in tourism services and infrastructure. Zambia lacks adequate hotel room capacity in its tourism and copper producing regions. Other areas include safaris canoeing, game drives, nature walks, bungee jumping, micro light flights, sport fishing, rock-climbing and orienteering.

Zambia Tourism Board

Great East Road,
Box 30017, Lusaka, Zambia
Trade Regulations, Customs, & Standards

Import Tariff
Customs valuation is ad valorem on a Cost Insurance and Freight (CIF) basis. A small number of goods may be imported duty-free. These include medicines, pharmaceuticals, veterinary supplies, medical equipment, computer parts, and chemicals in bulk, fertilizers, and seeds. Most goods fall into one of three tariff bands: 0-5% (Capital Equipment and Raw Materials); 15% (Intermediate Goods); or 25% (Finished Goods). Duty on productive machinery for agriculture, aquaculture, solar energy and mining is zero percent.

Import Value Added Tax (VAT) is collected on behalf of the VAT Division and taxed on imported goods that attract VAT. VAT is charged on the Taxable Value, i.e. Customs Value + Customs Duty (+ Excise Duty, where applicable) at the rate of 16% while Carbon Emission Surtax is charged on all motor vehicles being imported as well as those visiting and transiting. The Carbon Emission Surtax is an annual charge for those vehicles already in the country based on the engine capacity of the vehicle.

http://www.zra.org.zm/

Import Requirements & Documentation
Commercial documents such as a bill of lading, airway bill, and commercial invoice are required to clear goods with customs. The Import Declaration Form is used for statistical purposes, and no fee is required. Zambia Revenue Authority (ZRA) has implemented the automated system for customs data (ASYCUDA) world system which provides a platform that leads to a paperless customs clearance and domestic tax processes, enhancing opportunities for stakeholders involved in trade logistics to integrate their workflows and systems.

ZRA form CE 20, the standard form for entry and exit, is used for clearance at border posts. Certification is required to import meat (certification available from the Veterinary Department), plants and seeds and fruits (phytosanitary certification from Mount Makulu Research Station), food and drugs (Ministry of Health and Zambia Medicines Regulatory Authority), firearms and ammunition (Zambia Police), and gemstones and scrap metal export (Ministry of Mines).

www.zra.org.zm/commonHomePage.htm?viewName=GoodsExportationImportation

Labeling/Marking Requirements
Imported food products must have English-language labels that detail ingredients and shelf life of products. If inadequately labeled, these products may be confiscated and destroyed without compensation. Pharmaceutical
products must also be labeled in English, detailing ingredients, recommended dosage, shelf life, and any cautionary notes.

http://www.zabs.org.zm/

U.S. Export Controls
There are no sanctions against Zambia. The U.S. government requires export licenses for products related to national security, particularly dual-use technology that has commercial and military or proliferation application. Other items that the U.S. government regulates for export include defense articles, nuclear materials, and controlled substances. The U.S. government controls exports on a case-by-case basis, examining the following factors: the destination, the end-user, the product, and its end-use. The majority of exports which do require a license are either controlled on the Commerce Control List (CCL), administered by the Commerce Department, or the U.S. Munitions List (USML), administered by the State Department.

For more information on export controls, please visit the following sites:
http://www.bis.doc.gov/licensing/exportingbasics.htm
http://www.access.gpo.gov/bis/ear/ear_data.html#ccl

A list that consolidates eleven export screening lists of the Departments of Commerce, State, and Treasury into a single search as an aid to industry in conducting electronic screens of potential parties to regulated transactions is available here:  http://developer.trade.gov/consolidated-screening-list.html.

Temporary Entry
Visitors are generally permitted to enter the country with goods for their own use. When a visitor’s motor vehicle is not covered by a valid carnet, customs will issue a customs import permit (CIP). For goods not intended for the visitor’s own use, permission must be acquired from the Commissioner of Customs. Prior to importation, persons intending to import such goods should seek authority in writing, detailing the goods, value, purposes for importing, and duration of stay in Zambia. The Commissioner will in turn indicate the conditions for importation, which may include a refundable monetary security pending exportation after expiry.

Labeling/Marking Requirements
English-language labeling is required for all imported food and pharmaceutical products.

Prohibited & Restricted Imports
Zambian law prohibits the importation of pornographic, indecent, obscene, or objectionable material, as well as goods produced wholly or in part by prison labor. Regulations related to the importation and transportation of pharmaceuticals is relatively strict. Travelers are strongly encouraged to carry their prescription drugs and medications in original labeled containers, as well as the written prescription from their physician. Travelers who cannot get a doctor’s note for their over-the-counter medications, including some cold medicines, must leave them behind or risk arrest.

Customs Regulations
It is against both Zambian and U.S. law to buy, possess or transport animals or animal products, such as warthog tusks, tortoise shell, rhino horn, elephant ivory or any items made out of these materials. In Zambia, penalties range from large fines to mandatory five-year prison sentences. The Department of National Parks and Wildlife has screeners at international ports of entry and will prosecute offenders to the fullest extent of the
law. While many of these items are sold in open markets particularly aimed at foreign tourists, it remains the responsibility of the customer to ensure that he/she is not purchasing a prohibited item.

Standards for Trade

Overview
The Zambia Bureau of Standards (ZABS), a statutory body under the Ministry of Commerce, Trade and Industry is responsible for standardization, standards formulation, quality control, quality assurance, import and export quality inspection, certification and removal of technical barriers to trade. ZABS develops its own standards by consensus with interested parties within country but has the competence and expertise to certify organizations to QMS ISO9001:2008. ZABS implements compulsory standards through import and export inspections which fall under the Import Quality Monitoring Scheme mandate. ZABS has a library which is a selling point for International Standards Organization and the International Electrotechnical Commission, Regional Standards, and Foreign Standards.

ZABS is the officially designated WTO – Technical Barriers to Trade (TBT) National Enquiry Point (NEP) for Zambia. According to the WTO – TBT Agreement, Zambia's NEP regularly notifies the WTO Secretariat of all proposed government regulations, conformity assessment procedures and standards – related trade information that might significantly affect international trade. The NEP also disseminates to interested parties in Zambia for their review and comments proposed foreign regulations and standards issued through the WTO Secretariat.

Zambia develops its own standards, as well as adopts identical international standards developed by international standards and regional trade setting bodies, to promote regional trade and regional harmonized standards.

Zambia develops its own standards but can still adopts identical international standards developed by international standards and regional trade setting bodies to promote regional trade and regional harmonized standards.

Zambia needs support in implementation and use of standards, training, testing and certification of products.

Zambia is a member of the Common Market for Eastern and Southern Africa (COMESA) and Southern Africa Development Commission (SADC) and currently hosts the Secretariat, coordinating all Standards Harmonization Programs in SADC region. Zambia has in the past, coordinated the harmonization of dairy standards in COMESA region.
The country does not apply EU directives and standards except in some cases where Zambia, applies the European Committee for Standardization (CEN).

**Standards**
ZABS is responsible for standardization, standards formulation, quality control, quality assurance, import and export quality inspection, certification, and removal of technical barriers to trade. Zambia uses national standards that include adoption/adaptions. These standards have a defined due process for adoption.

Zambia has adopted and signed a memorandum of understanding for a number of ASTM International standards. Through direct adoption or adaption, Zambia uses standards from international governmental standards such as Codex Alimentarius, the United Nations Economic Commission for Europe, and the Organization for Economic Co-operation and Development. Zambia also uses private international standards (e.g. International Organization for Standardization, the International Electrotechnical Commission or International Telecommunications Union either through direct adoption or adaption. This also goes for European directives and standards such as the European Committee for Standardization, the European Committee for Electrotechnical Standardization and the European Telecommunications Standards Institute).

Entities that do not have a manufacturing presence can participate in national standards development as advisers or observers.

**Testing, Inspection and Certification**
Zambia uses the regional accreditation body under Southern African Development Community Cooperation in Accreditation. Test certificates from foreign laboratories are accepted if the laboratories are accredited. The U.S. testing laboratories can operate in the Zambian market and test U.S. products to comply with domestic regulatory requirements.

**Publication of Technical Regulations**
Zambia’s technical regulations, both proposed and final, are published in the Government Gazette. U.S. entities can comment within the 60 days public enquiry stage during the development process. Zambia maintains an annual regulatory agenda through the regulatory activities.

Patents and Companies Registration Agency
Mwayi House, Haile Selassie Avenue
Trade Agreements
Zambia belongs to the 19-member COMESA, which allows for preferential tariff duties between member states. Zambia also belongs to the 14-member SADC, which established an FTA in 2008. The establishment of a single market through the merged Tripartite Free Trade Area (COMESA, the East African Community (EAC), and SADC) was formally launched in June 2015.

Zambia has duty-free and quota-free access to the EU market, under the “Everything but Arms” (EBA) scheme for the world’s Least-Developed Countries (LDCs). Zambia is also eligible for trade benefits under the African Growth and Opportunity Act (AGOA), which provides duty-free/quota-free access to the U.S. market for most goods, including textile and apparel.

Licensing Requirements for Professional Services
Professional associations regulate the practice by all local and foreign service providers through compulsory registration and licensing to associations that include:
- The Law Association of Zambia,
- Zambia Institute of Chartered Accountants,
- Medical Association of Zambia
- Engineering Institute of Zambia

SADC: http://www.sadc.int
Investment Climate Statement

Trade & Project Financing

Methods of Payment
Credit is the most common method of payment used for Zambian imports. In general, Zambian companies find it difficult to finance their own imports and seek credit arrangements, but businesses considering offering their exports on credit should make a very careful check of the bona fides and finances of Zambian companies before doing so. Delinquent payments (even from government-owned companies) to suppliers are a common problem in Zambia. The cash-in-advance payment method may be advisable, especially when dealing with small companies. Credit Rating Agency Limited (CRA) is one of the few companies in Zambia that are authorized by the Securities and Exchange Commission (SEC) and approved by the Lusaka Stock Exchange Limited (LuSE) as a Designated Financial Advisor to SMEs. The CRA was licensed in September 2014 to primarily provide corporate rating and financial advisory services to institutions in Zambia.

Zambia has a few debt collection companies that include Zambia Attorney Collection, Inc., Bulwark Debt Collection Agency, and Incasso Partners.

The primary credit or charge cards accepted in most hotels, restaurants, travel agencies and stores are Visa cards. Most banks have automated teller machines which accept Visa more than MasterCard or American Express.

Banking Systems
Zambia’s commercial banking sector is composed of 19 international and local banks. All banks operating in Zambia must incorporate locally. As a result, there are no local branches of foreign (including U.S.) banks or financial institutions. Citibank Zambia Limited, a wholly-owned subsidiary of Citicorp NY, provides corporate banking services in Zambia.

The banking sector is supervised by the Bank of Zambia (BoZ) which reports to the Ministry of Finance. The sector is governed by the Banking and Financial Services Act of 1994. Industry observers generally credit the BoZ with making large strides in improving bank oversight over the past several years. The Financial Intelligence Center was established in 2010 through an Act of Parliament to combat money laundering and terrorist financing but this anti-money laundering regime is yet to meet international standards. http://www.fic.gov.zm

The banking sector has continued to expand and has led to a number of entities operating in multiple sectors such as banking, insurance, and the capital market. The regulatory environment is still fragmented with multiple regulators such as the Pensions Insurance Authority, BoZ, and SEC.
Foreign Exchange Controls
Bank accounts may be held in local or foreign currency, and funds are easily transferred out of the country or held offshore. Amounts over $5,000, carried in or out in cash or travelers checks, must be declared. Commercial banks and bureau de change operators restrict issuance of over-the-counter cash to $5,000 per transaction.

The BoZ is responsible for the management of the country’s foreign exchange reserves and participates in open market operations to either build up reserves or to smooth exchange rate volatility.

US Banks & Local Correspondent Banks
Zambia has one U.S.-owned bank:

Zambia Way
P.O. Box 70686,
Ndola, Zambia
Tel: +260-212-651113/3 and +260-212-651434-5 and +260-212-651437

Project Financing
The availability of project financing, particularly for export-oriented projects, is improving. Besides bilateral and multilateral government agencies, commercial banks and venture capital funds are playing an increasing role. Both the U.S. and European Union (EU) have established enterprise development funds, which can be accessed for projects in Zambia.

U.S. enterprise development funds include the Southern African Enterprise Development Fund and the United States African Development Foundation. The International Finance Corporation (IFC) and Commonwealth Development Corporation (CDC) both offer financial assistance for projects in Zambia.

There are no restrictions for U.S. companies to participate in bids and tenders floated by the Zambia Public Procurement Authority (ZPPA) and funded by the international institutions such as the World Bank, African Development Bank and others. After selection of a successful bidder, the relevant government ministry will supervise the project while payments are made from the financing institution. However, channels for remittance of project funds will differ according to the financing institution.

Multilateral Development Banks:

U.S. Commercial Service Liaison Offices at the Multilateral Development Banks (African Development Bank, World Bank)

The Commercial Service maintains Commercial Liaison Offices in each of the main Multilateral Development Banks, including the African Development Bank and the World Bank. These institutions lend billions of dollars in developing countries on projects aimed at accelerating economic growth and social development by reducing poverty and inequality, improving health and education, and advancing infrastructure development. The Commercial Liaison Offices help American businesses learn how to get involved in bank-funded projects, and advocate on behalf of American bidders. Learn more by contacting the Commercial Liaison Offices to the African Development Bank (http://www.export.gov/afdb) and the World Bank (http://export.gov/worldbank).

Web Resources
Commercial Liaison Office to the African Development Bank http://www.export.gov/afdb
Commercial Liaison Office to the World Bank http://export.gov/worldbank

Zambia is a member of the multilateral development banks including the World Bank and the African Development Bank (AfDB). Zambia continues to access finance from the World Bank and the AfDB.

Business Travel

Business Customs
Business law is based mostly on British law, and business customs are similar to those in the United States and Europe. Zambians are polite and mild-mannered, and a direct confrontational style is not well received in the local cultural context. Business dress code is formal for both men and women. If the attire is a skirt suit, then the length should be below the knees.

Travel Advisory
Crime is a problem in Zambia. Mugging, carjacking, and house and car break-ins are not uncommon. Copperbelt towns along the border with the Democratic Republic of Congo have seen periodic surges in crime
due to political instability across the border. There are no internal travel restrictions in Zambia, although areas around military bases may have restricted access. Website for State Department consular information sheet for Zambia: https://travel.state.gov/content/passports/en/country/zambia.html

Visitors should exercise caution when purchasing curios and souvenirs to avoid items that contain materials that are protected by the Convention on International Trade in Endangered Species.

Visa Requirements

A passport and visa are required to enter Zambia. The passport must be valid for at least six months after the intended date of departure from Zambia and have at least two blank pages. Foreigners coming to Zambia for business are entitled to a free thirty-day visa. Business visas may be obtained by presenting a letter of invitation from the organization that is sponsoring the traveler that specifies the nature of the intended business. Business visitors intending to stay longer than thirty days must apply for a temporary employment permit. A single-entry visa may be obtained at a port of entry for $50 and is valid for only ninety days. For a three-year multiple entry visa, travelers must apply in advance at a Zambian Embassy or consulate. The three-year multiple-entry visa fee is $80. Multiple entry visas may be obtained from the Embassy of the Republic of Zambia, 2419 Massachusetts Avenue, NW, Washington DC 20008, and telephone: (202) 265-9717.

The Government of the Republic of Zambia requires travelers to have at least two blank visa pages in their passport upon entering Zambia. Likewise, travelers transiting South Africa should ensure that their passports contain at least two completely blank (unstamped) visa pages each time entry is sought. These pages are in addition to the endorsement/amendment pages at the back of the passport. South African immigration authorities routinely turn away travelers who do not have enough blank visa pages in their passports.

U.S. companies that require travel of foreign business persons to the United States should advise the foreign business person to work through the U.S. Embassy consular office for their visa application and processing.

Visa applicants should go to the following links:

State Department Visa Website: http://travel.state.gov/visa/
U.S. Embassy Website: https://zm.usembassy.gov/
Web address for Consular Section: https://zm.usembassy.gov/visas/

In the past, the Zambian Drug Enforcement Commission (DEC) has detained a number of travelers for possession of Benadryl and other over-the-counter medications, which have contained small quantities of diphenhydramine, an active ingredient that is on Zambia’s list of controlled substances. Although unaware of these restrictions, U.S. citizens have been charged with drug trafficking offenses, had their passports confiscated, and been jailed. As a result, any U.S. citizen visiting Zambia is strongly advised to leave all non-prescription medications behind. When traveling with prescription medications, U.S. citizens should carry a doctor’s prescription and ensure that the medication is in its original bottle. Any U.S. citizen stopped by the DEC for possession of over-the-counter medications should contact the Embassy at +260-211-357-000 as soon as possible.

Currency

Payments within Zambia by law are made in kwacha only, even if the price is quoted in U.S. dollars. Foreign currency is only accepted by immigration officials for the purchase of visas at international airports. Most hotels, restaurants, travel agencies, and retail outlets take credit cards. The commercial banks will advance local currency against a credit card. Most banks have ATMs which accept Visa cards, more often than
MasterCard and American Express, for cash. Although traveler’s checks are widely accepted, they are no longer commonly used. To avoid additional exchange rate charges, the traveler’s checks must be in U.S. dollars, Euros, or British Pounds. Exchange of foreign currency is done in banks or Bureau de Change which are located in most towns in shopping areas, gas stations and supermarkets.

**Telecommunications/Electric**

Zambia is a member of Intelsat and receives video and communications services through its earth satellite station. Telecommunications services are generally adequate, but often unreliable and relatively expensive. The Western Fibre Route cable connecting Malawi to Zambia has led to significant retail price reduction for broadband services and facilitated domestic fiber builds. The first commercial LTE network launch has been undertaken and this has increased the number of mobile subscriber base in the country. Several internet service providers (ISPs) have rolled out WiMAX wireless broadband networks. In June 2016, Vodafone and Afrimax Group (Afrimax), a 4G telecommunications operator in sub-Saharan Africa, launched in Zambia. Vodafone Zambia offers a range of commercial connectivity products at retail and through direct sales channel including 4G and Wi-Fi mobile data service, fixed internet, and suite-of-office solutions. Government opened the National Data Center in February 2017 as part of the Smart Zambia project which aims to transform the country through information and communication technologies.

Cellular service is currently offered in all provinces of Zambia, but coverage is uneven. Major private firms that offer mobile phone facilities include MTN Zambia and Airtel Zambia. AT&T’s USA Direct service is available, as well as similar services to Britain, Sweden, and some other European countries. There are a number of callback service companies operating in Zambia.

Global System for Mobile (GSM) is the most prevalent digital cellular phone technology. There are 23 Internet Service Providers offering dial-up connections, broadband wireless, and VSAT services. The GRZ has liberalized the International Voice Gateway which now falls under ZICTA.

**Transportation**

There are regular airline connections to Lusaka, Ndola and Livingstone from Dubai, Dar es Salaam, Johannesburg, Gaborone, Windhoek, Harare, Addis Ababa, Cairo, Lilongwe and Nairobi. Domestic flights are available between Lusaka, Ndola, Kitwe and Chingola (Copperbelt Province), Mfuwe and Chipata (Eastern Province), Livingstone (Southern Province), Kasama (Northern Province), Mansa (Luapula Province) and Solwezi (Northwestern Province).

There are regular flights linking Johannesburg to Lusaka, Ndola, and Livingstone. The government is constructing a new airport terminal at the Kenneth Kaunda International airport in Lusaka while a new site for the Ndola airport was recently acquired and construction works have commenced. The Livingstone International airport upgrade began in 2012 and almost reaching completion. The government intends to upgrade one other international airport, Mfuwe, but the timeline is unclear. There are several private city bus lines. The railway system is run down and undergoing restructuring. Passenger train travel is unreliable and uncomfortable.

Government has made available $120 million for use in making major facelift of the rundown infrastructure. The 27-kilometer Chipata-Mchinji Railway, connecting the eastern border with Malawi through to Nacala Port in Mozambique was completed in 2010 and is operational. The GRZ intends to construct new railway lines from Chingola, on the Copperbelt, to Solwezi, in Northwestern Province, as well as a railway line connecting
Solwezi to the Benguela railway line in Angola, providing eventual access to Lobito Bay. Two other green field projects include construction of the 760 kilometer railway from Chipata to Mpika station on the TAZARA and from Nseluka to Mpulungu at a total cost of $3 billion.

Road transportation is the preferred means of transport for many goods. The core road network infrastructure consists of an interconnected network of bitumen paved roads and gravel roads that requires consistent maintenance by the Road Development Agency (RDA). The GRZ initiated the Link Zambia 8000, an accelerated national roads construction program in 2012 to overhaul its road networks maintained by the RDA. At the end of 2016, about 3,947 had been procured out which 678 kilometers were surfaced and open to traffic. A number of inner and outer ring roads are under construction at different stages of development which dramatically improved accessibility and reduced congestion. Zambia is landlocked, and goods come in and out via air freight, or through five African ports: Mpulungu, on Lake Tanganyika; Dar-es-Salaam, Tanzania; Beira, Mozambique; Durban, South Africa; and Walvis Bay, Namibia.

Language
Although there are 73 local languages in Zambia, English is the official language. Government business and commercial transactions are normally conducted in English.

Other dominant languages are Bemba, Kaonde, Lunda, Lozi, Luvalé, Nyanja, and Tonga.

Health
Basic medical care outside of major cities is extremely limited. Private medical clinics in major cities can provide reasonable care in many cases, but major medical emergencies usually require medical evacuation to South Africa, India, Europe, or the United States. Doctors and hospitals often require immediate cash payment for health care services. Medical insurance covering air ambulance evacuation is highly advisable. For the most recent travel information on Zambia, check: www.travel.state.gov.

Malaria is endemic in Zambia. Prophylaxis is strongly recommended. HIV prevalence is very high in Zambia, with approximately 14% of the adult population HIV positive nationwide, but with higher rates in urban areas. Drinking water should always be treated if bottled water is not available.

Local Time, Business Hours and Holidays
Zambia does not participate in daylight savings time. Zambia’s time zone is Universal Time (UTC, GMT) plus 1 hour.

Zambian business hours:
Government Offices are open from 8:00 a.m. to 5:00 p.m and close from 1:00 p.m. to 2:00 pm, Monday to Friday. Bank hours vary, but most banks are open from 8:00 a.m. to 3:30 p.m. Monday to Friday. Some are open every Saturday while most open every first and last Saturday of the month from 8:15 a.m. to 11:00 am. Shops are generally open from 8:15 a.m. to 6:00 p.m., Monday to Sunday while others open from 08:15 a.m. to 10:00 p.m.

Zambian Holidays in 2017 are:
Sunday, January 01 New Year’s Day
Monday, January 02 New Year’s Day Holiday
Wednesday, March 08 International Women’s Day
Monday, March 13 Youth Day (Public holiday March 12 falls on Sunday)
